7<sup>th</sup> & 8<sup>th</sup> August 2010

## Underwater Photography Workshop Jurassic Coast

### Itinerary:

The weekend activities will start each day with a brief morning chat before gearing up for the dives, by our resident professional photographer, giving advice on what to try out on the 2 dives of the day. You will also have the chance of a one to one advice session each day, along with a chat and a chance to enjoy dinner and a couple of drinks with fellow underwater photographers.

We will be diving off the Jurassic coastline which offers plenty of opportunities for some great photography. I think the weekend will focus mainly on Macro photography – but bring all your kit as you never know what might spring up! Your entry fee will also allow you to enter your 2 best photos taken on the day. The winner and runner up will receive prizes.

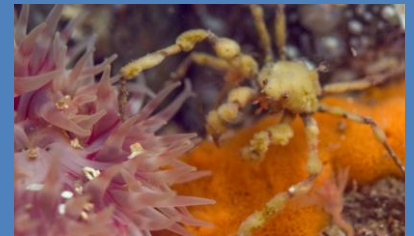

We will be diving out of Swanage, Dorset and so sites will include Swanage Pier and the surrounding bays. There will also be the chance to jump on a boat dive with Divers Down of Swanage if you fancy something different. They have a full itinerary over the weekend, including wrecks if you want to break out your wide angle equipment!

Perfect for beginners and those more experienced!

This weekend will offer the opportunity to inexperienced divers and underwater photographers the chance to practise in some sheltered shallow waters. You can spend the whole weekend shore diving if you want to take it easy!

*Tickets cost £30*

*Limited Places*
